

Seamus Hinz

813-947-1200 | seamushinz@ufl.edu | github.com/seamushinz | Gainesville, Florida

Education

University of Florida | GPA: 3.71

Aug. 2023 – Dec. 2027

Bachelor of Science in Computer Science, Minor in Business Administration

Gainesville, FL

- **Relevant Coursework:** Data Structures & Algorithms, Competitive Programming, Operating Systems, Engineering Statistics, Databases, Public Speaking, Software Engineering, Marketing
- **Kyoto University (UF in Japan):** Created a large-scale 3D environment, built virtual space AI implementations, and assisted with Project AirSim research

Sep. 2025 – Dec. 2025

Work Experience

Software Developer Intern

May 2026 – July 2026

IBM

Baton Rouge, LA

- Built the foundational prototype for a full-stack AI application using IBM watsonx, Go, and React for an enterprise client pitch, ingesting call transcripts to assist support staff, leading to a projected \$30M+ 3-year cost optimization with faster and more knowledgeable customer support
- Won the IBM Consulting Capstone Challenge among 28 teams by pitching a full-stack client solution across three rounds, demonstrating entrepreneurship, teamwork, and innovation as an agile team

Marketing Teaching Assistant

Jan. 2026 – May 2026

University of Florida

Gainesville, FL

- Mentor students during weekly office hours on complex marketing strategies to increase conceptual retention and performance
- Design rigorous examination criteria and modernize core lecture materials to optimize student engagement to support a course of 1300+ students

Project AirSim Research Assistant

Nov. 2025 – Dec. 2025

Kyoto University

Kyoto, Japan

- Enhanced configuration workflows for Project AirSim in Unreal Engine by architecting a unified GUI for runtime system modifications and automated script execution
- Engineered a native C++ file-selector component and verified cross-platform plugin stability by evaluating standard AirSim directory constraints

Commercial Web Game Developer

Nov. 2021 – Jan. 2022

Cool Math Games

Remote

- Led a distributed engineering team of three to design, build, and ship a fully-featured 2D web title using GameMaker Studio 2
- Negotiated and sold a commercial license of the game to Cool Math Games leading to over 45,000 total plays, validating scalable development practices and market viability

Projects

Meal Logging Journaling App | Expo, React Native, MongoDB

May 2025 – Aug. 2025

- Built a cross-platform mobile app using agile development methodologies with Expo alongside two teammates to create and store personal written logs for meals
- Spearheaded front-end components and screens prioritizing iOS-native design using React Native and Expo Router, developed log retrieval and creation functions using MongoDB and REST APIs

Facial Stress Recognition Website | Next.js, JavaScript, HTML, React.js

Jan. 2025

- Built front-end features and components using MediaPipe and React for a stress detection app made with FastAPI and Next.js
- Implemented real-time facial expression analysis to assess stress levels with a team of three to promote healthy breaks from computer work

Technical Skills

Languages: Swift, SwiftUI, C++, C#, JavaScript, TypeScript, Python, GML, HTML, CSS, Java, SQL

Tools: Xcode, Git, React, Next.js, Visual Studio Code, Visual Studio, Webstorm, CLion, Godot, GitHub

Certifications: AI Fundamentals and Applications (University of Florida), IBM Cloud Essentials

Involvement

Vice President - iOS Programming Club | University of Florida, Gainesville

Jan. 2025 – Present

- Cofounded an engineering organization at UF dedicated to teaching native application development utilizing Swift, SwiftUI, and Xcode
- Directed multi-channel campus marketing campaigns and specialized workspace events, scaling active membership to 60+ students
